-22kW ChargeBox Model: Fully charge your Tesla Model X with a 100kWh charging capacity in about 7 hours.

-22kW ChargeBox Model: Your TOGG T10X V1 with a capacity of 52.4kWh becomes ready for use in 3 hours and 40 minutes when fully charged.

Modular Electronic Hardware Design

Mutlusan®
electric 41 years

Mutlusan Chargebox is an Electric Vehicle charging box specially developed for charging electric vehicles with alternating current in single-phase or three-phase structures.

-With its IP55 protection level, ChargeBox provides superior protection against dust and water, ensuring safe and effective use in all outdoor conditions.

-Provides the most suitable solution for your needs with two versions: Cable version and socket version.
